

2019 Personalized Plates

The following are changes made in personalized plates by the Kentucky Department of Transportation on renewals of personalized plates beginning in 2019.

Customers with January, February and March birthdays, whose registration expires December 2018, will be issued a renewal receipt and decal with an expiration date of April 2019. This allow the time needed to transition from a December birth month expiration.

These customers will then come back before April 2019 to renew to their birth month the following year. The registration fees in 2019 will be prorated to reflect the shorter timeframe. The tax amount will now be prorated because it is determined by the value of the vehicle for the entire year and is not conditional based on amount of time you own the vehicle during the year.

All other birth months (April-December will have their registrations renewed in their birth month in 2019.

Customers will receive another renewal card in the mail 60 days before the April 2019 deadline.
